TECHNICAL SKILLS

- Programming**
 - Dart — Advanced
 - Javascript — Intermediate
 - Java — Intermediate
 - Php — Intermediate
 - Rest API — Intermediate
- Framework & Libraries**
 - Flutter
 - Next.JS
 - Laravel
 - Tailwind CSS
 - CodeIgniter
- Database**
 - MySQL
 - Firestore (NoSQL)
- Tools & Version Control**
 - Docker
 - GIT & Version Control
 - Figma
 - Adobe Illustrator
 - CI/CD Pipelines
 - Google Play Console
- Language**
 - Bahasa Indonesia (Native)
 - English (Intermediate)

PROFESSIONAL SUMMARY

Results-driven Mobile Application Developer with 5+ years of hands-on experience designing, developing, and maintaining high-quality Android applications using Flutter/Dart. Proven track record of delivering end-to-end mobile solutions — from UI/UX implementation and API integration to production deployment on Google Play Store. Passionate about clean architecture, performance optimization, and delivering seamless user experiences

WORK EXPERIENCE

- Mobile Application Developer**
Quantum Indonesia – Yogyakarta Nov 2025 – Jan 2026 || *Freelance*
 - Developed a Flutter-based Android application (TeknisiQ) to support the operational workflow of Quantum Partners' field technicians and admins.
 - Worked with the backend team to optimize REST API communication, reducing synchronization issues and improving overall application stability.
 - Managed the full release cycle on the Google Play Store (including APK/AAB bundling and versioning management), ensuring each post-release update was free of critical bugs.
 - Tech Stack:** Flutter, Dart, GetX, REST API.
 - Play Store:** TeknisiQ
- Mobile Application Developer**
PT Yuk Laundry Online (Yulo) – Jakarta Feb 2024 – Feb 2025 || *Full Time*
 - Built and maintained Flutter-based Android applications for point-of-sale transactions and online laundry order management, achieving over 500 downloads on Google Play.
 - Implemented a real-time Order Tracking feature, providing live order status updates and improving operational transparency.
 - Improved application responsiveness by refactoring network layers, optimizing REST API calls, and reducing unnecessary requests.
 - Managed the complete Google Play Store release lifecycle, including application signing, store listing updates, version management, production releases, and post-release maintenance.
 - Tech Stack:** Flutter, Dart, GetX, REST API.
 - Play Store:** Yulo, ALKI Merchant
- Mobile Application Developer**
RAMS Tech – Yogyakarta Nov 2022 – Jun 2023 || *Freelance*
 - Designed and implemented a modular Flutter architecture for the Merchant Juragan Kucek POS application, improving code maintainability and simplifying future feature development, achieving over 1,000 downloads on Google Play.
 - Integrated RESTful APIs to enable real-time synchronization of orders and transaction data across multiple devices, ensuring consistent and reliable data updates.
 - Tech Stack:** Flutter, Dart, GetX, REST API.
 - Play Store:** Merchant Juragan Kucek

INDEPENDENT PROJECT

- Water Billing Management System**
Flutter, Next.js, Firebase (Firestore)
 - Architected and developed a cross-platform water billing management system using Flutter for mobile operations and Next.js for web-based administration.
 - Implemented customer management, automated bill calculation, outstanding balance tracking, expense recording, and monthly billing workflows.
 - Integrated Firebase Firestore for centralized cloud storage and real-time synchronization across mobile and web applications.

EDUCATION

- Bachelor of Science — Informatics (S1)
AMIKOM YOGYAKARTA UNIVERSITY | September 2016 – August 2018
- Diploma — Computer Science / Informatics (D3)
STMIK AMIKOM YOGYAKARTA | August 2013 – June 2016

KEY HIGHLIGHTS

- Successfully deployed over 20+ (95%) production applications to Google Play Store with full release management ownership.
- Demonstrated cross-disciplinary skills spanning mobile development, UI/UX design, and backend API integration.
- Consistently delivered projects on time in fast-paced freelance and full-time environments.
